At Taylor’s University, we are constantly keeping ahead to ensure our students graduate future-ready. This 4th Industrial Revolution (4IR) will change the way business is done. The revolution is characterised by a range of new technologies that are fusing the physical, digital and biological worlds, impacting all disciplines, economies and industries, and will challenge the status quo of education and its graduates.

Experts predict a massive shift and change in how the world does business. Here are some global views and discussions:

According to the World Economic Forum, 4th Industrial Revolution will have 4 MAJOR IMPACTS on business, particularly in terms of:

- CUSTOMER EXPECTATION
- PRODUCT ENHANCEMENT
- COLLABORATIVE INNOVATION
- ORGANISATIONAL FORMS

- Klaus Schwab - Founder and Chairman of the World Economic Forum

According to MCKINSEY, up to 375 MILLION WORKERS may need to change their occupational category by 2030, & DIGITAL WORK could contribute $2.7 TRILLION to global GDP by 2025.

Increased global competitiveness will accelerate cost pressure, which will lead to substantial downsizing or reassignment of a large contingent of workers. MCKINSEY estimates that up to 800 MILLION INDIVIDUALS may be displaced by AUTOMATION by 2030.

80% of the worlds jobs in 2030 haven’t yet been invented – Dell
